

Survey on the use of NORIP reference intervals in Norway, May 2010

(preliminary data)

The customers of NKK (Norwegian EQA organisation serving the big labs in Norway) were asked to give the reference interval they use for a man, 40 years old.

Today, May 20th 2010, 8 days after the request was sent, 52 labs have replied with the result shown in the figure below, sorted on % of labs using the exact NORIP suggestion.
